"a single processor including a sequencer which determines which source is being processed during the time period and which services a different source during the next clock period and sequencer includes a counter which indicates which source is serviced at any time and the counter is coupled to the clock input for indexing the counter in response to a clock pulse and a strobe input and the counter is coupled to the strobe input and is reset by a signal on the strobe input" as recited in the <u>independent claim 11.</u>

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
